

React Native Developer (f/m/d)

Shape the future of mobile time tracking with us – as a React Native Developer, you'll be evolving our high-performance mobile applications that bring our time management solutions to the fingertips of thousands of users.

TimeTac is a continually growing and innovative software company with a focus on developing and providing web-based and mobile time tracking solutions. We maintain a modern, open corporate culture with a strong vision and a great working atmosphere in which creative thinking is encouraged. The products of TimeTac are among some of the leading cloud applications in the categories of time tracking and absence planning solutions.

Your future Role

- Develop and implement new features for our mobile time tracking applications using React Native
- Maintain compatibility with evolving TimeTac API requirements, ensuring continued functionality across all our mobile platforms
- Refactor code and uphold code quality by following modern development practices and supporting the latest evolution in the React Native community
- Participate in weekly refinement sessions to ensure requirements are well-defined before development begins
- Manage the end-to-end release process, including preparing and deploying new app versions
- Design and maintain automated test suites (unit, integration, and end-to-end), and assist the QA team with the development and execution of additional test scenarios
- Nice to have: With your knowledge in Kotlin and Java, maintain our existing Android app, by implementing bugfixes and porting small features from our React Native app
- Collaborate cross-functionally with backend and frontend developers, UX/UI designers, the software architect, and the Product Owner

Your Skills

- At least 3-5 years of experience in mobile apps development with strong proficiency in React Native, with nice-to-have knowledge in Android development (Kotlin and Java)
- Experienced in writing automatic UI tests as well as unit and integration tests to ensure code quality
- Proficient in implementing polished, user-friendly interfaces
- Familiar with testing and using REST APIs
- Basic knowledge of database management tools is an advantage
- Experienced in writing clear, structured documentation
- Demonstrate strong analytical thinking, decisiveness, and assertiveness and the ability to quickly adapt to new situations and implement changes
- Take ownership of tasks, processes, and responsibilities with reliability and commitment
- Excellent communication in English, written and spoken

This may inspire you

- a modern office in the city center of Graz
- flexible working time models
- mutual appreciation and respect
- possibility to work up to 2 days per week remotely
- 4 € food voucher for ever day in the office
- continuous learning culture
- multicultural team with great teamspirit
- initiatives for mental and physical fitness

We welcome applicants of any gender and origin to become part of the success story of our highly motivated team.

The stated position is available for full-time employment (38,5h/week).

We offer a minimum salary of € 55.356 gross per year (ST1, Regelstufe) with at least three years of relevant experience in Mobile Software Development based on the IT collective agreement. Considerable over-payment is possible for candidates with relevant professional experience and qualifications.
