

QA Software Tester / Backend (PHP) (f/m/d)

Are you detail-oriented and committed to delivering the highest quality?

If testing processes and evaluating applications to uncover bugs is your passion, then this role is made for you. You play a decisive role in our backend development team to deliver high quality, perfectly-functioning software and applications to our customers.

Graz

Full-time employee

TimeTac is a continually growing and innovative software company with a focus on developing and providing web-based and mobile time tracking solutions. We maintain a modern, open corporate culture with a strong vision and a great working atmosphere in which creative thinking is encouraged. The products of TimeTac are among some of the leading cloud applications in the categories of time tracking and absence planning solutions.

Your future Role

- Perform manual testing within the backend team to help maintain the stability and reliability of our products.
- Continuously improve software quality, review user-stories and strive for test automation for the TimeTac product line.
- Effectively identify and communicate bugs discovered during testing.
- Work closely with Software Developers and Product Managers to understand technical requirements and create test plans and test cases.
- Contribute actively to agile team meetings. (Our working language is English.)

Your Skills

- Strong written and verbal communication skills in English.
- A minimum of 3 years' experience as a QA Software Tester or in a similar role.
- Familiarity with PHP and MySQL at a basic level.
- Proven experience testing REST APIs.
- Hands-on knowledge of monitoring tools such as Kibana or Sentry.
- Interest in security and performance testing.
- A proactive mindset and enthusiasm for being involved in the broader software development process.
- Detail-oriented, responsible, and communicative approach to work.
- Experience using Jira and other Atlassian products is desired.

Our Stack

- PHP (Symfony), MySQL, Redis – backend REST API development
- JavaScript, React, Redux, HTML and CSS – frontend web development
- Swift, Objective-C and Java – native iOS and Android development
- Codeception, Jest, Selenium – automated testing
- Debian – deployed operating system
- Ansible – software provisioning and configuration management
- Gitlab, Docker – Continuous Integration and Deployment
- PHP, Python, Bash, Go – scripting and automation
- Elasticsearch, Logstash and Kibana (ELK stack), Prometheus – Monitoring

We use git, JIRA, Slack and Google Workspace.

We welcome applicants of any gender and origin to become part of the success story of our highly motivated team.

The stated position is available for full-time employment (38,5h/week).

This may inspire you

- a modern office in the city center of Graz
- flexible working time models
- mutual appreciation and respect
- possibility to work up to 2 days per week remotely
- 4 € food voucher for ever day in the office
- continuous learning culture
- multicultural team with great teamspirit
- initiatives for mental and physical fitness

We offer a minimum salary of € 44.500 gross per year (ST1, Einstiegsstufe) without relevant experience based on the IT collective agreement. Considerable over-payment is possible for candidates with relevant professional experience and qualifications.
